

SERVICE BULLETIN SB98.11

Serial Numbers:
1001 - 1450

Machines/Models: AB46 Electric & Bi-Energy

THIS BULLETIN IS MANDATORY

DATE: August 10, 1998

PURPOSE: To ensure proper plug braking.

OPERATION REQUIRED: Rewire electric circuit.

PARTS REQUIRED: Jumper wire assembly (# 030905-000)

REIMBURSEMENT: UpRight will reimburse the owner of record for .5 hour of labor at \$30.00 per hour and reasonable travel at \$ 0.25 per mile. Reimbursement will be made upon receipt by UpRight of your completed warranty claim form. Please reference SB 98.11 on your warranty claim form.

PROCEDURE: Read all instructions thoroughly and refer to Figure 1 before starting.

1. Unplug battery connectors.
2. Remove engine compartment cover.
3. Remove electrical panel cover.
4. Locate orange wire attached to contactors (Figure 1).
5. Cut orange wire at diode connection on main power contactor.
6. Leaving diode in place, remove orange wire.
7. Install green wire on to forward and reverse contactors (Figure 1).
8. Insert green wire as shown, through holes in panel and attach to terminal #4.
9. Reinstall covers.
10. Connect batteries.
11. Perform full test of drive functions.
